BATTERY ISOLATORS

Enhances your alternator performance for efficient charging, maximum power, longer battery life, and safer operation.

- Protects main starting battery from auxiliary drain
- Regulates current for multi-battery system
- Ideal for automotive, marine, and RV applications

Part #	Description	Packaging	Master Carton	
			Quantity	Weight
08770	Isolator 95 Amp	Clam Shell of 1	6	2 lbs.
08771	Isolator 120 Amp	Clam Shell of 1	6	3 lbs.

Without an isolator.

In a multi-battery system, the battery with the lower state of charge will drain power from the battery with the higher state of charge.

The benefits of using an isolator.

The battery isolator protects your starting battery power so that no matter how weak your accessory battery becomes, the accessory battery will never drain power from the starting battery.

Additional benefits of using an isolator.

The battery isolator also saves time by allowing simultaneous charging of both batteries. The amount of current flowing into each battery is determined by its state of charge, which guarantees that each battery will get fully charged, prolonging its life.
